

BLINK SOLAR

Irish solar water pump manufacturers

Overview

What is a solar powered water pump?

Solar powered water pump designed and manufactured in Ireland. Comes fully enclosed in a steel housing with a PV panel as the lid and is fully pressure regulated. The SPS SolarFlo35 pumps water up to 1.5km in distance and up an incline of 20m vertical elevation. The system also has the capacity to power a 12V electric fence.

How do I use the SPS solar pump?

Connect your outlet pipe delivering water to your tanks/troughs. Switch it on. The battery reserve means the pump can operate any time of the day and overnight as it is not powered directly from the solar panel. The SPS solar pump is placed beside the water source (up to 5m above the level of water).

What is a fluid solar pump?

The FLUID SOLAR pumps have been developed to pump clean water from a well, utilising energy obtained from photovoltaic panels.

How does the SPS solar pump work?

The battery reserve means the pump can operate any time of the day and overnight as it is not powered directly from the solar panel. The SPS solar pump is placed beside the water source (up to 5m above the level of water). It can be placed on a concrete surface/slab and bolted down if desired. A 5m long suction pipe is supplied as standard.
