Do you need a solar inverter?

Solar inverters are a necessary but often forgotten part of a home solar panel system since they convert sunlight into usable electricity for your home appliances. Without a solar inverter, you wouldn't be able to use those solar panels to power your home.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

What does a solar inverter do?

First, let's clarify the role of an inverter. Solar panels generate DC power, while household appliances operate on AC power, as supplied by the electricity grid. The primary role of a solar inverter is to convert DC solar power to AC power.

How do I choose a solar inverter?

Ensure the inverter matches the specifications of your solar panels and overall system capacity. For example, a mismatch between panel wattage and inverter capacity can lead to energy loss or system inefficiency. ESAS experts can help you ensure perfect compatibility. Look for inverters with high efficiency ratings, typically above 95%.
