Are battery energy storage systems a good investment?

Battery energy storage systems (BESS) are experiencing a remarkable upswing in Germany - and quite rightly so. They offer one of the key need that an energy system increasingly characterised by renewable energies needs: short term Flexibility. At the same time, they are becoming a new, promising asset class for investors.

What is a battery energy storage system?

Currently, most large battery systems (Battery Energy Storage Systems, or BESS) are powered by lithium-ion batteries. Such batteries are favoured especially due to their long life cycle and simple operation. Furthermore, alternative battery technologies are still in development and therefore not yet ready for market launch.

Are alternative battery technologies ready for market launch?

Furthermore, alternative battery technologies are still in development and therefore not yet ready for market launch. In addition to battery packs, BESS consist of two other main components: an energy conversion system and an energy management system, which monitors the power flow and the battery's temperature.
