Overview

Does Ericsson have a 5G base station?

. Ericsson (NASDAQ: ERIC) was selected by the Japanese communications service provider KDDI as a partner for Japan's first vault 5G base stations. The company will support KDDI in deploying "manhole-shaped" 5G base stations, supplying sub-terrain antennas.

Will a 5G base station share in a railway tunnel?

This will be the first PoC in Japan on 5G base station sharing in a railway tunnel. 5G is a next-generation communication technology that offers ultra-high-speed, large-capacity, low-latency communication, and is expected to be used in a variety of industries such as mobility and medicine.

How much will Japan invest in 5G?

The four major 5G network carriers in Japan are anticipated to invest a significant sum, to the tune of \$14 billion, to expand the 5G network in the country. This covers base stations, servers, and fiber optic investments.

Why is 5G so popular in Japan?

For the same reason, Japan has allowed operators to mount 5G base stations atop traffic signals since 2022, which has accelerated 5G deployments throughout the nation, as reported by GMSA. Higher-capacity use cases will be able to thrive as tiny cells are deployed and network density is enhanced.
