# **Kosovo Home Solar Power System**

## Overview

---

How can Kosovo improve its energy sector?

The Government of Kosovo aims to put its energy sector on a sustainable path, through developing renewable energy potential, improving energy efficiency, closing a 50-year-old power plant, and rehabilitating another old power plant.

Does Kosovo have solar power?

Kosovo has the potential of capturing solar energy directly and converting it to electricity. The region of highest solar potential based on global horizontal irradiation is the southwestern part of Kosovo, centred around the city of Gjakova. Solar power is already used on the roofs of some buildings.

How did Kosovo get its own energy system?

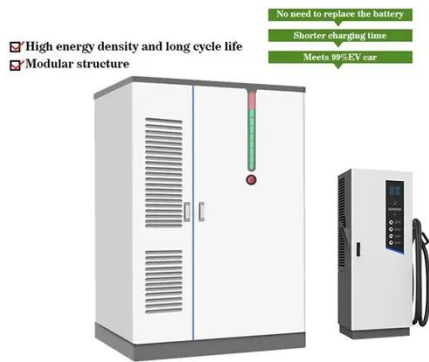

Kosovo was part of the Regional Energy Community and was connected with the regional system through interconnections with Serbia, North Macedonia, Montenegro and Albania. KOSTT made an agreement with ENTSO-E so Kosovo gets his own independent region of energy administration. Kosovo gets full independence and control of its energy industry.

Who regulates the energy sector in Kosovo?

Regulation of activities in energy sector in Kosovo is a responsibility of the Energy Regulatory Office (ERO). An additional factor in the energy sector in Kosovo is Ministry of Economic Development (MZHE), which has the responsibility of dealing with issues that have to do with energy. MZHE prepares legislation and drafts strategies and projects.
