## Overview

---

What is Kyrgyzstan's solar energy project?

The solar energy project aligns with Kyrgyzstan's Energy Sector Development Strategy, which aims to develop 1,500 MW of renewable energy by 2035. This strategy, supported by the World Bank, seeks to diversify the energy sector, increase domestic electricity generation, and reduce greenhouse gas emissions.

Will Kyrgyzstan develop new solar power plants in Batken & Talas?

Kyrgyzstan partners with the IFC to develop new solar power plants in Batken and Talas, aiming to power over 125,000 homes and advance its renewable energy goals.

What can Kyrgyz Republic expect from a solar power plant complex?

Additionally, a comprehensive plan for a solar power plant complex with a potential capacity of up to 500 MW is currently in its final stages of development. Upon completion of the project, the Kyrgyz Republic can anticipate a significant increase in the number of electricity consumers.

How has the IFC impacted Kyrgyzstan's solar energy sector?

In the initial phase of the project, the IFC played a crucial role in conducting a comprehensive assessment and structuring a pilot solar energy project, ranging from 100 to 150 MW, in the Kochkor district of the Naryn region. This groundwork has set the stage for attracting increased private sector investment into Kyrgyzstan's solar energy sector.
