Large-scale solar system in Manchester UK

Application scenarios of energy storage battery products

Overview

Who are the biggest solar energy companies in the UK?

Below is an in-depth look at the 10 largest solar energy companies shaping the future of renewable energy in the UK. Headquartered in London, Lightsource bp stands as one of the world's foremost developers of solar projects. Established in 2010, the company has successfully combined solar expertise with the global reach of BP, its primary partner.

How many people use solar power in the UK?

Many consumers are already experiencing the benefits of solar power, with over 1.5 million domestic solar installations in the UK. With the right conditions in place, there is potential for millions more to install rooftop solar.

Can the UK grow the solar supply chain & manufacturing capacity?

There is a once-in-a-generation opportunity to grow the solar supply chain and manufacturing capacity in the UK where it makes economic sense to do so, and supports our Clean Power 2030 mission.

How will the UK solar industry grow?

Additionally, sectors like assembly, business services, and new energy infrastructure construction are going to be crucial for the growth of the UK solar industry. The Taskforce mapped the current state of global and UK supply chains (including related services) and reviewed the solar innovation landscape.
