Were these search results relevant?

.

What is a power ups & how does it work?

A ups is a device used to generate current. It replaces a faulty or missing power supply. It is a safe, uninterrupted backup power solution that provides electrical protection for networks, data centers, critical systems and industrial manufacturing processes.

Why should you choose Mitsubishi Electric uninterruptible power supplies?

At 99.9995%, Mitsubishi Electric Uninterruptible Power Supplies achieve the highest equipment reliability among all UPS suppliers, ensuring you - and your customers - are protected against downtime 24/7/365.

Why should you buy a Fuji Electric UPS system?

Fuji Electric's high-efficiency UPS systems help to protect critical customer systems and data from power troubles while at the same time helping to improve the global environment by reducing CO2 emissions. Japan China Asia Icon means main region for sale. In case of other regions, please contact us.
