# Large wind power generation system in Johannesburg South Africa

## Overview

---

How many wind projects are there in South Africa?

Currently, the wind industry has 1.3 gigawatts of wind projects currently in construction. We have a pipeline of 53 gigawatts of wind projects under development in the country.” Country: South Africa Scope of Project: 53 GW of Wind Energy Entities Involved: South African Wind Energy Association, Ministry of Energy.

Why is wind energy important in South Africa?

Wind energy continues to lead South Africa’s transition to a low-carbon economy, advancing a secure renewable energy future. With over 3.5 GW of installed capacity from 37 wind power plants, contributing over 46,480 GWh annually, wind plays a vital role in the country’s energy security.

What is South Africa wind energy programme?

South Africa Wind Energy Programme The South Africa Wind Energy Programme (SAWEP) originated from the declaration by the Minister of Minerals and Energy in June 2000 of the Darling National Demonstration Wind Farm as a National Demonstration Project and her request for international assistance.

Is wind energy a key component of South Africa's energy transition?

According to the South African Wind Energy Association (SAWEA) CEO Niveshen Govender, wind energy has steadily established itself as a vital component of South Africa’s energy transition. He also noted that this is a transition that has occurred over the past decade.
