Lg solar air conditioner

Overview

Is LG's new solar hybrid air conditioner eco-friendly?

LG electronics announced yesterday the debut of the first eco-friendly solar hybrid air conditioner in Korea. This new product provides up to 70 watts of power per hour via solar cell modules attached to the top of this outdoor unit.

Who makes LG air conditioners & energy solutions?

LG Air Conditioners and Energy Solutions is a division of LG Electronics that specializes in the manufacture and sale of air conditioning and air purification systems for both private and industrial applications. The division also produces energy-saving products: solar panels and lighting systems, as well as the "smart home" system.

What are the benefits of the LG solar hybrid air conditioner?

With this ability, the LG solar hybrid air conditioner will be able to reduce carbon emission of up to 212kg over 10 years, which is equivalent to 780 pine trees. With this product, using your air conditioner can now be more comfortable and at the same time will set your mind free from worries about destroying the environment.

How does LG hybrid air conditioner work?

The Hybrid conditioner of LG has solar modules attached on top of the outer unit of the air conditioner that collects sunrays and convert it into electric power of up to 70 watts per hour.
