Overview

How many base stations in Portugal have 5G?

Since the end of the first half of 2022, ANACOM has been reporting quarterly on progress in the implementation of these latest-generation mobile communications networks. At the end of 1st quarter 2024, according to information reported by operators, there were 9,999 base stations in Portugal with 5G technology.

What is the density of 5G base stations in Portugal?

At the end of 1st quarter 2024, the density of 5G base stations in Portugal was one base station per 10 km² - on average, 97 5G base stations per 100,000 inhabitants.

How will 5G change the telecommunications landscape in Portugal?

Future Prospects: As 5G technology continues to evolve, network and spectrum sharing will likely play an increasingly important role in the telecommunications landscape in Portugal. ANACOM is expected to continue supporting sharing initiatives and updating the regulatory framework to reflect new developments and best practices.

What is Portugal doing to promote 5G technology?

Innovation and Research Initiatives: Portugal has also been promoting innovation and research initiatives to support the development and deployment of 5G technologies across various sectors. Collaborative projects involving academia, industry, and government entities are encouraged to explore new use cases and applications of 5G.
