# Lisbon Grid Energy Storage Project

## Overview

---

How much money does Portugal need to modernise its electricity grid?

Portugal: Portugal has unveiled a \$480 M (€400 M) investment package to modernise its electricity grid and significantly expand battery energy storage systems (BESS), following a major Iberian blackout earlier this year.

How will Portugal improve grid resilience after April blackout?

Government outlines €400 million plan to strengthen grid resilience after April blackout. Portugal will launch a competitive tender for 750 MVA of battery energy storage before January 2026, as part of a broader €400 million package aimed at improving grid reliability and preventing future blackouts.

What will Portugal's energy transition look like in 2026?

In addition, an auction for large-scale BESS is planned by 2026, marking a step forward in Portugal's energy transition strategy. To support critical infrastructure like hospitals, the government will provide \$28 M (€25 M) for solar PV and storage installations.

How much will Portugal invest in battery storage after Iberian blackout?

Portugal will invest \$480 M (€400 M) to strengthen grid stability and scale battery storage, aiming for 750 MW of BESS capacity after Iberian blackout.
