# Lithuania home solar power system

## Overview

---

How much solar power does Lithuania have?

As of February 2024, Lithuania boasts over 61,000 prosumers and 800 MW of solar capacity. Moreover, from the 3rd of March 2024 from 12:00 to 14:00, Lithuanian renewable consumption for the first time reached 100%, through the means of national wind and solar production.

Is Lithuania a good country for solar energy?

Lithuania has been significantly expanding its solar parks, growing from zero in early 2000s to 814 MW capacity in 2022. Lithuania is a net energy importer. In 2019 Lithuania used around 11.4 TWh of electricity after producing just 3.6 TWh. Systematic diversification of energy imports and resources is Lithuania's key energy strategy.

Is Lithuania a good or bad country for solar rooftop PV development?

Moreover, from the 3rd of March 2024 from 12:00 to 14:00, Lithuanian renewable consumption for the first time reached 100%, through the means of national wind and solar production. This country profile highlights the good and the bad policies and practices of solar rooftop PV development within Lithuania .

Does Lithuania need a new energy system?

Lithuania imports a large share of its electricity needs, while bioenergy is taking the lead in domestic energy supply. By 2030, Lithuania wants to reduce its electricity imports by half and produce 70% of its electricity needs from domestic sources. It plans to complete its synchronisation with the continental European power system by early 2025.
