# London Energy Storage Vehicle Plan

## Overview

---

What is the UK's EV infrastructure strategy?

The Government published the UK's EV infrastructure strategy in March 2022, estimating that the UK would need at least 300,000 public charge points by 2030. The strategy prioritises the delivery of rapid charging on major roads and supports local authorities to develop their own EV infrastructure strategies and increase delivery on local streets.

What is the city of London Transport Strategy?

The City of London Corporation have adopted a Transport Strategy that includes planning for and enabling the transition to the use of Electric Vehicles.

Does Britain have a battery energy storage system?

The UK government has included a fivefold increase in Great Britain's battery energy storage system (BESS) fleet in its plan to achieve clean power generation by 2030.

What is local EV infrastructure planning?

Local EV infrastructure planning must be guided by the high-level system outcomes of achieving a net zero energy system, at lowest investment costs, while meeting the needs of EV drivers and local communities.
