

BLINK SOLAR

London Zhongji solar Glass

Overview

What is solar control glass?

Today's technically advanced solar control glass products are here to help. We provide a range of glass options specifically designed to control the amount of heat and light that passes through the window. These solar control glass options are perfect for sealed units in windows on south and south west facing elevations.

Does solar control glass reduce glare?

It reflects and absorbs heat as well as filtering light for reduced glare. Using a solar control glass can reduce the need for air-conditioning and blinds. There are many types of solar control glass offering different aesthetic options; tinted, reflective and neutral.

Is solar control glass a good option for a building?

The increased use of glass in architecture today makes it imperative to consider the comfort of a building's occupants. Solar control glass can be an attractive feature of a building whilst at the same time minimising, or even eliminating the need for an air conditioning system, reducing running costs of the building and saving energy.

Which glass is best for a solar control unit?

In the home, there is no better option than our sealed units created using SGG PLANITHERM 4S glass – part of the pioneering Saint-Gobain Glass range of PLANITHERM low-E glass products. For commercial buildings, our solar control sealed units can be manufactured using either SGG COOL-LITE SKN 176 II or SGG COOL-LITE SKN 183.
