London solar power generation and energy storage subsidies

Overview

Could a new energy storage scheme help the UK achieve energy independence?

The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure. This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up renewable power and bolster the UK's energy security.

How does the UK support green energy?

The UK government's robust support framework for green energy spans a diverse range of schemes tailored to promote renewable generation, energy efficiency, and industrial transformation.

What is the UK's energy storage Investment Support Scheme?

Credit: David Pimborough / Shutterstock. The government of the UK has launched a new investment support scheme aimed at bolstering the country's energy storage infrastructure. The initiative aims to encourage the development of long-duration energy storage (LDES) facilities, which have not seen significant investment in nearly four decades.
