Madrid Base Station Communication Construction Project

Overview

What is the first fully driverless metro line in Madrid?

Madrid, Spain (Metro Rail Today): Alstom, a global leader in sustainable mobility solutions, has signed a landmark contract with Metro de Madrid to upgrade the signalling system on Line 6, transforming it into the city's first fully driverless metro line.

What is the busiest metro line in Madrid?

Metro Madrid - Line 6: Alstom has signed a contract with Metro de Madrid to upgrade the signalling of line 6, making it Madrid's first driverless metro line. This 23.5 km circular line with 28 stations is renowned as the busiest line of the entire network, with 110 million users in 2023, an average of 618,000 passengers on a working day.

Why did Madrid upgrade to a fully automated metro system?

The upgrade to fully automated operation signifies a notable advancement in Madrid's urban transportation, enhancing the daily travel experience for thousands of residents and visitors, and bringing modernisation, resilience and energy savings to the heart of the metro network. We had reported here before:.

Who is Alstom - metro de Madrid?

Alstom has been a strategic partner of Metro de Madrid for over 50 years, providing the first CBTC signalling system for lines 1 and 6, and supplying a significant portion of the interlocks in the metro network. Additionally, Alstom supplied 85% of the fleet traction systems, which were manufactured at its industrial centre in Trápaga (Bizkaia).
