# Madrid solar Power Generation and Energy Storage

## Overview

---

What is energy storage in Spain?

It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms.

Will Madrid become a central base for energy storage systems?

“Our strategy is very clear: to turn Madrid into our central base for energy storage systems. From there, we’ll provide agile and specialized support to clients across Europe and Latin America,” Gattoni explained.

How will Spain increase its energy storage capacity?

Spain has launched an ambitious €700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems.

How much photovoltaic capacity will Spain have by 2030?

1. The Ministry of Ecolog The Spanish National Energy and Climate Plan (PNIEC) sets a target of 76 GW of photovoltaic capacity by 2030, including 19 GWac from self-consumption and 57 GWac from large-scale projects.
