

**BLINK SOLAR**

# **Majuro Power Station Generator Manufacturer**

## Overview

---

Sinosoar, a major China-based engineering company, won the World Bank contract to build new generators and build a new power plant. How many generators does Majuro have?

The Majuro diesel power station 1, commissioned in 1984, has a total of five diesel generators installed. This includes four original Peilstik generators and a single Caterpillar generator added in 1992.

Why does Majuro need a new power system?

In order to stabilize power service, the Marshalls Energy Co. was forced to import more than half-a-dozen rental containerized generators last year that currently provide the backbone of Majuro's power. International donors and the Marshall Islands government have lined up to fund a huge overhaul of the power system for Majuro.

What is a 10 kW generator?

A typical 10 kW generator can supply enough power for essential home appliances, small businesses, or as a backup power source. In the context of diesel generators from China, models in this category are designed to deliver stable and reliable power output, making them popular choices for standby power applications.

What types of generators are made in China?

Many manufacturers in China produce a wide range of generator types, including diesel generators and gasoline generators, which cater to different power needs. Additionally, Chinese manufacturers often provide reliable power solutions and have established a reputation for producing durable and efficient generator sets.
