Overview

What is Malawi's energy supply?

Malawi's energy supply is dominated by biomass (firewood, charcoal, agricultural and industrial wastes) accounting for 84% of the total primary energy supply. The total installed electricity capacity is currently at 351 MW with around 98% Hydro on the shire river.

Who owns power stations in Malawi?

This article lists power stations in Malawi. All stations are owned by the Electricity Supply Commission of Malawi (ESCOM). The list is not exhaustive. Operational since 16 November 2021. ^ Kutengule, Memory (10 April 2018). "Malawi: Power Situation Will Improve - Masi". Lilongwe: Malawi News Agency via AllAfrica.com. Retrieved 14 April 2018.

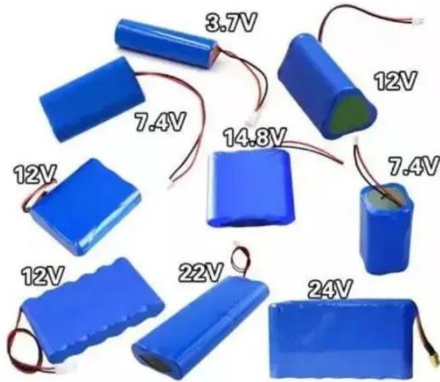

What is the Malawi Bess project?

The Malawi BESS project will guide the scale-up of BESS projects in the Consortium's participating countries. To alleviate energy poverty by 2030 and save a gigaton of CO2 in low and middle-income countries, it is estimated that 90 GW of BESS must be developed to support the required 400 GW of renewable energy.

How can Malawi achieve a cleaner energy future?

The project will also contribute to a cleaner energy future for Malawi, reducing reliance on costly diesel generators, cutting carbon emissions by ~10,000 tonnes annually, and unlocking the full uptake of at least 100 MW of variable renewable energy, such as solar and wind power, into the grid.
