Malaysia Super Hybrid Capacitor Factory

Overview

What is a hybrid capacitor?

Hybrid capacitor is a new method of supercapacitor electrode design, which can effectively improve the performance of a supercapacitor. One electrode of the hybrid capacitor is the supercapacitor electrode, and the other electrode is the battery electrode.

What types of capacitors are available?

Starting with radial lead type capacitors, we expanded our production items to block-Snap-In or Screw-type and chip (Surface Mount) type. From 2025, we will start new production of hybrid types, which are in high demand, especially for automotive applications.

What is a vertically integrated capacitor manufacturer?

As a vertically integrated capacitor manufacturer, we offer prototype and custom manufacturing, as well as a diverse spectrum of standard product lines ranging from small chip size capacitors to large building blocks. Camel plastic film capacitors part number system, [click here](#).

Who is a film capacitor manufacturer?

Camel Component is one of the recognized leader in film capacitor design and manufacture. Our innovative capacitor design capability offers the flexibility to meet your most demanding film capacitor requirement.
