# **Malaysia solar container communication station hybrid energy generation solution**

## Overview

---

Is solar energy a viable solution for Malaysia?

Muniff concluded, “Solar energy has proven to be an ideal solution for Malaysia, given its equatorial climate and high levels of solar insolation. By integrating solar power into telecommunications infrastructure, we are reducing reliance on non-renewable energy sources, lowering operational costs, and significantly decreasing emissions.

What is long San solar hybrid station?

He highlighted, “The Long San Solar Hybrid Station is the first solar hybrid station in Sarawak to utilise advanced Lithium-Ion battery and an energy management system to optimise renewable energy generation and to reduce dependence on costly diesel fuel.”.

What is a solar hybrid station & how does it work?

The new solar hybrid station now provides renewable energy to 104 households and 16 other properties including a church, a clinic, mission houses and a school. This gives the Long San community a more sustainable source of energy, supporting the operation of basic services while promoting equitable socio-economic growth.

Who donated long San solar hybrid station?

The Long San Solar Hybrid Station was donated by Shanghai Electric, covering its supply, delivery, installation, testing, and commissioning of 350kWp of solar PV panels, 7 racks of batteries, and associated electronic converters and control systems. The project commenced in January 2021 and was completed in April 2022.
