Mali s power grid energy storage policy

Overview

This article examines the reality of Mali's energy infrastructure for industrial operations, outlining the limitations of conventional power sources and exploring a captive solar-plus-storage system as a strategic solution to ensure operational continuity and predictable long-term costs. What does the government of Mali do?

Through all these actions, the Government of Mali, through the Ministry of Energy and Water, aims to give national energy stakeholders a framework for the rapid development of sustainable energy projects and programmes.

Is Mali ready to scale up renewables?

The Ministry, working through the Mali Renewable Energy Agency (AER-Mali), has initiated a partnership with the International Renewable Energy Agency (IRENA) to assess Mali's readiness to scale up renewables.

What is the energy access problem in Mali?

Mali faces a critical energy access challenge. The national power access rate was 50% in 2019 (compared to 36.11% in 2015). The problem is particularly acute in rural areas with 21.12% access rate in 2019 (compared to 15.75% in 2015).

What is the electricity system in Mali?

Mali's electricity system encompasses a national grid that is owned and operated by Energie du Mali SA (EDM SA) which supplies 35 towns, including Bamako. In addition to the national grid, EDM SA manages 30 isolated centres equipped with diesel generators and two centres supplied by Côte d'Ivoire.
