Malta Outdoor Power Rescue

Overview

Each ministry within the government is responsible for structuring its prevention plans, whilst enhancing their framework of operations and competence based on prevention. The Civil Protection Act (Cap.411) lay.

Why is Enemalta launching an emergency power plant in Malta?

Enemalta has emphasised that Malta can source enough energy to meet demand, and said that power cut issues are related to inadequate distribution networks. The UNEC-run emergency power plant is intended as a temporary fallback solution should one of Malta's primary power sources falter.

How much does Malta's power plant cost?

The plant, which will cost taxpayers €37 million, is expected to remain in operation until a second undersea interconnector linking Malta to the European power grid is completed. That project is likely to be completed towards the end of 2026 or the beginning of 2027.

Is Malta a member state of the Union civil protection mechanism?

Malta, through the Civil Protection Department is a participating Member State of the Union Civil Protection Mechanism. Malta has a number of bilateral agreements and memorandums of understanding with various neighbouring states. Official Ministerial website.

What does the Civil Protection Department do in Malta?

The Civil Protection Department in Malta is the leading governmental department that ensures national training and planning for national exercises is carried out as stipulated by local and EU legislation. Training exercises are carried out at national and local level by the competent authority assisted by the Civil Protection Department.
