# Mauritania Solar Power solar System

## Overview

---

On 12 August 2025, Mauritania's Minister of Energy and Petroleum, Mohamed Khaled, announced a strategic renewable energy project with a total investment of \$287 million, aimed at expanding the country's clean energy capacity. How will Mauritania's new solar power project help agri-food industry?

The project will provide rural electrification for 40 localities in south-eastern Mauritania, through the installation of hybrid mini photovoltaic power plants and the construction of connecting lines. The project will also support value-creating activities, especially in the food cold chain and agri-food processing.

Does Mauritius use solar energy?

Mauritius has an attractive potential for solar energy, with an average annual solar radiation value of some 6 kWh/m<sup>2</sup>/day. Solar photovoltaic (PV) energy is an option due to the almost year-round intensive sunlight. To achieve the target of 60 percent renewable energy by 2030, Mauritius has commissioned six more solar farms.

How much money does Mauritania receive from the AfDB & GCF?

Her fiction and non-fiction narratives captivate and resonate with a diverse audience, showcasing her versatility and depth as a writer. Mauritania receives \$289.5 million from the AfDB and the GCF to develop solar power generation, transnational electricity interconnection and rural electrification.

Who is Mauritania's AfDB?

The AfDB has been active in Mauritania for over 50 years, supporting various strategic development sectors, such as agriculture, governance, water and sanitation, energy, mining, private sector, transport, and social. Source: Zawya Motoni Olodun, with an illustrious seven years in marketing operations, stands as a beacon in the field.
