Mexico Portable Energy Storage Export Tariff

Overview

Does Mexico have a tariff on energy exports?

Mexico, on the other hand, faces a 25% tariff on energy exports – such as its 450,000 barrels per day of crude shipments to the U.S. – unless those products meet USMCA requirements . Currently, 50% of Mexican goods and 38% of Canadian goods qualify for exemption under USMCA rules . Below is the timeline for implementing these tariffs.

Are Mexican exports subject to the ad valorem tariff?

Therefore, Mexican exports are not subject to the general 10 percent ad valorem tariff applied to all imports from other countries. However, Mexico is explicitly included in other tariff provisions targeting specific product categories, particularly under Sections 3 (d) and 3 (e) of the executive order.

Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.

What is the tariff rate for imports from Mexico?

The current tariff rate for imports from Mexico is 25%. However, this rate can vary depending on the specific product category and any applicable trade agreements or exceptions. Mexico tariffs directly increase the cost of importing goods by 25% of the product value.
