Middle East Energy Storage Power Supply Procurement Project

Support photovoltaic input and AC mains input
Suitable for home energy storage and emergency backup power supply

Overview

State offtaker Emirates Water & Electricity Company (Ewec) has invited prequalified companies to submit their proposals for a contract to develop and operate an independent 400MW battery energy storage system (bess) power project in Abu Dhabi. Who are the major energy companies in the Middle East?

It includes big names from the Middle East region and overseas, such as Dubai-headquartered Masdar and Saudi Arabia's ACWA Power, France's EDF and TotalEnergies, and major players in renewable energy and battery storage from China, South Korea, and Japan, among others.

What is energy storage system deployment in MENA?

Energy Storage System deployment in MENA Energy Storage Systems (ESS) play a critical role in the integration of VRE into the power grid, as these systems manage the intermittenencies of renewable energy resources and mitigate potential power supply disruptions.

Does Saudi Arabia have a battery energy storage system?

The contracts cover five separate 500 MW/2,500 MWh storage projects across Saudi Arabia, with sites in Riyadh, Qaisumah, Dawadmi, Al Jouf, and Rabigh. The Saudi Electricity Company (SEC) has awarded a series of battery energy storage system (BESS) contracts to China's BYD totalling 2.5 GW/12.5 GWh, multiple Chinese media reported on January 11.

Will Saudi Arabia be able to deploy battery energy storage systems by 2030?

According to Saudi Energy Minister Prince Abdulaziz bin Salman, the nation has set a goal of deploying 48GWh of battery energy storage systems by 2030. This ambitious target not only supports Saudi Arabia's energy transition but also injects fresh momentum into the global renewable energy and energy storage markets.
