Monocrystalline solar panel prices in Auckland New Zealand

Overview

Individual solar panels in New Zealand cost around \$230 for a 440W panel. However, the total system cost includes inverters, mounting systems, and installation. Find out how to choose solar panels.

How much do solar panels cost in New Zealand?

A 3kW solar power system would need ten 300W solar panels at a rough cost of \$8000 – \$10,000 in New Zealand. Conversely, a 4kW solar power system would require fourteen 290W solar panels at a ballpark figure of \$10k – \$11k installed.

How much does a 440w solar panel cost in New Zealand?

A single 440W solar panel in New Zealand costs around \$230. But panels are just one part of the puzzle - you'll also need an inverter, mounting gear, and professional installation to turn those panels into a fully functioning solar power system. Find out how to choose solar panels here. [Should I Wait For The Price Of Solar To Fall?](#)

.

What types of solar panels are available in NZ?

Polycrystalline solar panel Polycrystalline solar panels are probably the most common type of NZ solar power panels. They are also the cheapest type of solar panel to make and therefore have one of the lowest revenue per kWh numbers in front of them. The positive side is that their low cost makes them very popular solar panels.

Are monocrystalline solar panels a good choice?

Monocrystalline solar panels are considered to be one of the most efficient types of solar panel. This means that they produce the highest revenue per kWh and therefore cost a little more to install and require little maintenance.
