

**BLINK SOLAR**

# **Moscow 100MW solar energy storage power generation project**

## Overview

---

Is solar energy on the verge of a major expansion in Russia?

Solar energy in Russia might be on the verge of a major expansion thanks to a government support program for renewable energy sources, industry experts told The Moscow Times.

What does Unigreen Energy say about Russia's insolation?

Unigreen Energy said Russia has more than enough insolation — solar radiation hitting an object — to produce solar energy. There is no sun there!’ Well, our data tells us differently.”.

How many solar projects are there?

There are more than 8,100 major solar projects currently in the database, representing over 340 GWdc of capacity. There are over 1,300 major energy storage projects currently in the database, representing more than 104,000 MWh of capacity. The list shows that there are more than 180 GWdc of major solar projects currently operating.

How much power does Russia get from solar power?

While the global economy gets roughly 10% of its power from wind and solar sources, in Russia, solar’s share is just 0.2%. The government gives fossil fuel companies trillions of rubles in tax incentives each year, even though they already turn the same amount in profits, according to Greenpeace Russia.
