NAS supporting UPS uninterruptible power supply equipment

Overview

Why do I need a QNAP NAS ups?

QTS, QuTS hero, UPS systems with USB or SNMP support Power outages or voltage fluctuations can cause data corruption or system failure. By connecting a compatible UPS (Uninterruptible Power Supply) to your QNAP NAS, you can prevent data loss and perform a safe system shutdown when necessary.

How to choose the right uninterruptible power supply for Synology NAS?

Sep 2025 Choosing the right Uninterruptible Power Supply (UPS) for Synology Network Attached Storage (NAS) is crucial to protect data from power interruptions and ensure system stability. For 1-2 bay NAS devices, from 500-850VA should be enough (with desktop PC and router connected). For 4-8 bay NAS devices go from 1000-1500VA.

Does a NAS need an ups?

If your NAS uses RAID, sudden power loss can wreak havoc. A UPS helps maintain array stability and prevents extended rebuild times caused by abrupt shutdowns. It also reduces wear and tear on hard drives by preventing sudden power-offs that can stress spinning disks.

Can a ups connect to a NAS with a data connection?

By connecting the UPS to a NAS with a data connection, the UPS can tell the NAS how much battery is left and have it safely shut down. It's not just a NAS the UPS can provide power for. Anything with a compatible cable will be able to connect to and draw from the device.
