Nassau Sino-Singapore Energy Storage Project

Overview

What is the energy storage project on Jurong Island in Singapore?

An energy storage project on Jurong Island in Singapore was put into operation in early December 2022. Generally contracted by China Energy Engineering Group Shanxi Electric Power Engineering Co., Ltd., the project has a designed capacity of 200 megawatts/200 megawatt-hours, the largest of its kind in Southeast Asia.

Why is energy storage important in Singapore?

Puah Kok Keong, Chief Executive, EMA said, “As Singapore expands solar deployment, energy storage systems will become more important to enhance grid resilience and ensure power system stability. I welcome the development of energy storage systems that are safe, cost-effective and space-efficient.”.

Does Singapore need energy storage systems to manage solar intermittency?

However, the minister said there is a need to “step up energy storage systems to manage solar intermittency.” Talks are currently ongoing with Sembcorp, the engineering conglomerate behind the 200MW/285MWh battery energy storage system (BESS) installation on Singapore’s Jurong Island.

When will Southeast Asia's largest energy storage system be up?

The Republic will achieve its target of having “giant batteries” to store at least 200MW of energy three years early, when Southeast Asia’s largest energy storage system on Jurong Island is up and running by November.
