New Delhi solar container outdoor power brand new field

Overview

Will solar power be a 'self-reliant Delhi'?

In Rithala, Gupta launched the installation of the solar power systems on 1,000 govt buildings, calling it a step towards making "govt buildings the identity of an energy self-reliant Delhi". The project aims to generate 55 MW of clean energy.

Will Delhi's New Solar System save Rs 2-3 lakh a year?

The newly installed 25-kilowatt solar system at the Delhi Jal Board building in Rithala will generate over 28,000 units of clean energy annually, said Gupta. Power Minister Ashish Sood, also present at the event, said the rooftop solar initiative will not only save Rs 2-3 lakh each year but also contribute to Delhi's environmental goals.

What is Delhi solar policy 2023?

Under the Delhi Solar Policy, 2023, notified in March 2024, the government aims to scale its solar capacity to 4,500 MW by 2027. This ambitious target includes 750 MW from rooftop solar within the city and approximately 3,750 MW from utility-scale solar sourced from outside Delhi.

How has Delhi's solar policy impacted rooftop solar adoption?

At the time of the policy announcement, Delhi's installed rooftop solar capacity stood at 237 MW, which has increased to 313.4 MW, as of March 31 2025, indicating a 32 per cent increase in a year. This growth reflects the early impact of the policy, which catalysed a surge in rooftop solar adoption across the capital.
