New smart inverter 12V to 220V

Overview

What does a 12V to 230V power inverter do?

A 12V to 230V power inverter converts 12V DC power to 230V AC power. It is ideal for various users including caravaners, truck drivers, doctors, electricians, joiners, and anyone who enjoys camping or boating.

What types of inverters are available?

We offer a variety of specifications and models of inverters to meet your power needs, whether for home, automotive, or travel purposes. The Leaptrend Sirius series 1000W 12V Pure Sine Wave Inverter is perfect for most off-grid systems, whether for a van, RVs, trucks, boats, yachts, coffee van inverter or any remote location needing power.

Which 12V 240V Inverter should I buy?

If you need a heavy-duty 12V to 240V inverter, the Silverline 263764 is a good, if expensive, choice. The 700W maximum output was the highest on test, and the fan didn't kick in until we plugged in the laptop and the battery charger. Another plus point was the quietness of the fan, as it was only 5dB louder than the ambient noise inside the car.

How to choose a wattage inverter?

1. Firstly, Size the Right Power Output. Inverters will be rated by a wattage value. According to this code, if there were 1000 Watt air conditioning and 800 Watt fridge; These electronics would be counted as 1800 Watts then require an inverter over 1800W. In this case, Leaptrend 2000W and 3000W inverters can perfectly cover your power needs.
