Nordic Smart Photovoltaic Energy Storage Container 10kW

Overview

This 10kW solar system with battery storage consists of 10550W solar panels, 15kW hybrid inverter, and 2*5.12kWh battery modules, totaling a 10kWh battery backup, paired with solar cables. Why should you choose a 10kW Solar System?

Enjoy the freedom and security of having a robust and sustainable energy solution at your disposal. Experience the next level of energy independence with our 10kW solar system and 10kWh lithium-ion battery storage, and take a substantial stride towards a greener, more self-sufficient future.

How does a 10kW solar panel work?

The 10kW solar panels are engineered to maximize energy capture, providing ample power to charge the included 10kWh lithium-ion battery storage system. This high-capacity battery solution ensures reliable energy storage, allowing you to harness and store surplus solar energy for use during periods of low sunlight or at night.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.

What is a solarfold on-grid container?

The solarfold on-grid container can also be expanded with various storage solutions. Each package contains a different number of Solarfold containers and the appropriate battery capacity. These combinations are not only used to optimize personal consumption, but can also be particularly valuable for energy trading on the control energy market.
