How much does it cost to reposition an intermodal shipping container?

The intermodal shipping container is 70 years old. Over the years it has been refined but ownership costs have increased. For example, this year, the annual operating prices have ranged between \$25,000 to \$40,000 to reposition an empty container.

Are foldable containers more effective than standard containers?

Furthermore, we developed an integer programming model to analyze through experiments the effect of foldable containers in each situation. The results show that foldable containers have proven to be more effective than standard containers in many situations, and they facilitate a faster recovery from container imbalances.
