# Off-grid solar container hybrid type for Kuala Lumpur city lighting

## Overview

---

What is smart street lighting in Malaysia?

In today's rapidly evolving urban landscape, smart city technologies are transforming how we live, work, and interact with our surroundings in Malaysia. Smart street lighting, a cornerstone of smart cities, provides extensive benefits beyond traditional illumination.

Can a street lighting system be independent of the grid?

The primary objective of this study is to present a design for a street lighting system based on LEDs, which is hybrid-powered by solar energy and batteries, thereby making it independent of the grid.

What is a hybrid microgrid?

BoxPower's hybrid microgrid technology combines solar, battery, and backup power into a modular platform designed for remote and resilient energy.

Is there an efficient off-grid street lighting solution based on P&O-MPPT?

This research proposes an efficient off-grid street lighting solution based on P&O-MPPT using LoRaWAN communication without internet access. This solution is scaled to a four-street lamp setup. Thanks to the energy method system created, the energy demand of the street lamp is provided according to the condition of the energy sources.
