Overview

What is a circulation pump?

These pumps are included in our solar water heating packages, and are used to circulate heat transfer fluid in the primary or secondary solar hot water loops. We have a number of circulation pump solutions for all types of applications, from single family home hot water systems, to industrial heating and air conditioning systems.

Are solar-powered water pumps eco-friendly?

Whether you are looking for the most environmentally friendly pumping solution on the market or want to give your garden a plus of beauty and elegance, a solar-powered water pump is what you should look for. It's 100% green, efficient and cheap! Each pump comes with its solar panel, and it's straightforward to install and use.

What are solar panels plus pumping solutions?

Solar Panels Plus provides a number of different pumping solutions for solar hot water and solar space heating systems. These pumps are included in our solar water heating packages, and are used to circulate heat transfer fluid in the primary or secondary solar hot water loops.

How to use a solar water pump?

The Sunbell Solar Water Pump is ideal for a garden patio or pond. It comes in with a 3 m long cable and 4 different nozzle heads. It's very easy to use- just immerse the pump under water, place the panel under full sunlight and it will start automatically. Besides, the beautiful waterfall will give your garden a unique, special look.
