Oslo Fiber Optic Energy Storage Equipment

Overview

Who is Foss fiber optic & cabling?

Since 1984, Foss has been a market leader in fiber optic and cabling infrastructure, with systems that cover everything from transport networks and residential buildings to data centers, industrial buildings, defense and offshore. Foss's philosophy has always focused on in-house manufactured products.

Who is Foss fiber?

The company specializes in delivering bespoke fiber optic solutions to customers in a range of industries, including telecommunications, oil and gas, and the public sector. Foss Fiber was established in 1987 and since then has become one of the largest manufacturers of fiber optic solutions in Norway.

Why do we need fiber optic cables?

Equipment and processes can be remotely controlled and monitored. This places great demands on the communication equipment. Fiber optic cables are immune to electromagnetic noise and have high transmission capacity. This makes fiber optics the natural solution for modern and robust communication.

Are fiber optic cables safe?

Fiber optic cables are immune to electromagnetic noise and have high transmission capacity. This makes fiber optics the natural solution for modern and robust communication. In 2019, company Foss became an active member of the „The Security and Defense Industry Association of the Slovak Republic
