Oslo LiFePO4 Battery Pack

Overview

What are LiFePO4 batteries used for?

With the insight into the customer's special power needs and over years well-experience, we designed some standard lifepo4 battery packs that widely used in emergency lights and exit signs, solar street lights, medical monitoring equipments.

Are LiFePo 4 batteries safe?

The Tracer range of LiFePO 4 Battery Packs has been developed to be the safest rechargeable technology available in the tracer range. Housed in a rugged ABS case that is waterproof rated to IP64 the prismatic LiFePO 4 cells provide an identical voltage output to SLA while weighing in at 1/3 of the weight.

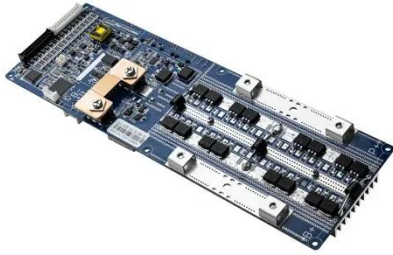

What is a LiFePo 4 battery pack?

Our LiFePO 4 Battery Pack with Grab Handle range meet the same safety standards as the tracer LiFePO 4 Battery Packs and are ideal for powering motors and where a higher output current is required. Their lightweight technology and spring-loaded grab-handle makes carrying easy.

How do you charge a LiFePO4 battery?

Wrap cells in fish paper. Seal connections with heat shrink tubing. Mount pack in a ventilated case (prevents thermal runaway). Charge at 0.5C (e.g., 50A for 100Ah pack) using a LiFePO4-compatible charger. Monitor cell voltages - deviations >0.1V indicate balancing issues. Store at 50% charge if unused for months.

Oslo LiFePO4 Battery Pack

LiFePO4 Battery Pack , Safe, Long-Lasting Power

Our LiFePO4 battery packs deliver reliable, long-lasting power for applications like solar energy storage, electric vehicles, and portable devices. Built with lithium iron phosphate technology, ...
