What is Fuxi storage tank paint?

Storage Tank Paint by FUXI ensures long-lasting protection and corrosion resistance for industrial storage tanks. As a leading high performance coatings supplier, FUXI delivers reliable and durable solutions. Contact us to explore the advantages of our storage tank paint.

Can polysiloxane paint be used in a storage tank?

Using polysiloxane paint as topcoat, only two coats of paint are required for construction, saving the construction man-hours and material costs of the intermediate coat. The corrosive environment within the storage tank is mainly the medium stored in the storage tank.

How to store oil safely?

In order to store oil safely, it is also necessary to use anti-static oil tank paint. The service life of the coating system on the inner wall of the storage tank is closely related to the steel condition of the inner wall of the storage tank and the selected coating material.

What are the different types of storage tank coatings?

According to the coating thickness, the storage tank coatings types of the inner wall can be divided into three categories: thin coating, heavy anti-corrosion coating, and glass flake/fiber-reinforced lining. As a leading industrial paint factory, our thin coatings mainly include pure epoxy coatings and phenolic epoxy.
