# **Pakistan purchases stone for solar glass**

## Overview

---

Why do Pakistanis use solar panels?

Rather than waiting for national reforms, many Pakistanis began adopting solar technologies directly – often installing panels and inverters without much reliance on subsidies or centralised planning. This makes Pakistan’s solar growth somewhat unusual in the global landscape.

Is solar a viable energy solution in Pakistan?

Falling equipment prices, combined with volatile local fuel costs and persistent power shortages, have made solar one of the most economically viable energy solutions in Pakistan today. Despite this, significant gaps remain in how the transition is being managed.

Did Pakistan import more solar panels in 2024?

And yet by the end of 2024, Pakistan imported more solar panels than almost any other nation in the world. The South Asian country, once facing economic challenges and high energy poverty, is now witnessing one of the most unexpected clean energy success stories of the decade.

Is solar a green option in Pakistan?

Harjeet Singh, strategic adviser to the Fossil Fuel Non-Proliferation Treaty Initiative, says Pakistan’s story shows solar is not just a green option, but an affordable one.
