Payment Method for 500kW Off-Grid Solar Container

Overview

What is a 500-watt off-grid Solar System?

A 500-watt off-grid Solar System is designed to provide power supply for 4-5 hours to 2-3 BHK homes in India having an unreliable electricity supply. It is like a small power plant with a peak Load capacity of up to 650 Watts. It consists of monocrystalline panels and comes with more than 97% Inverter efficiency and over 16% Module efficiency.

How much does A 500KW solar power system cost?

500kW solar power system costs US\$461,256. (valid for 30 days). Note: The output voltage designed for the 500kW PCS on this page is three-phase 380v-415v If you request dual voltage 120v/240v, please leave a message about the required output voltage and email solar@pvmars.com to get a quote for customized output.

What is included in a 500KVA solar power plant?

A complete 500kva 500kW solar power plant includes the following configurations: Optional solar mounts, PV combiner boxes, and PV cables. PVMARS provides a complete turnkey photovoltaic energy storage system solution. After we complete production, the system delivered to you can be used immediately after connections are made.

How can pvmars provide a complete 500KW solar system solution?

The premise of providing a complete 500kw solar system solution requires: You only need to submit load (electrical equipment) information, pictures/drawings of the installation location, output voltage range, and other data. PVMARS's engineering team can provide a complete solar energy storage system (off-grid or mini-grid solution).
