

## BLINK SOLAR

# Photovoltaic container 500kW solar energy storage vs power grid

## Overview

---

How to choose a 500 kW / 1075 kWh containerized energy storage system?

When choosing a 500 kW / 1075 kWh containerized energy storage system, you need to consider your application scenarios, equipment performance, system security, scalability, vendor reputation and many other factors. Ensure that the system you choose can meet your long-term needs and provide adequate support and service guarantees.

What are energy storage systems?

The energy storage systems is productized, integrating energy storage batteries, PCS (Power Conversion System), power distribution, temperature control, fire protection, water immersion door sensors, and monitoring communication, providing comprehensive control over the system's operational status and risks.

What are Megatron 300 & 500 kW battery energy storage systems?

MEGATRON 300 & 500kW Battery Energy Storage Systems are AC Coupled BESS systems offered in both the 10 and 20' containers. Designed with either on-grid (grid following) or hybrid (grid forming) PCS units, each BESS unit is capable of AC coupling to new or existing PV systems making them an ideal solution for commercial/industrial customers.

What voltages are available for a battery energy storage system?

All system systems are offered with either 400VAC or 480VAC 3 phase interconnect voltages. Each commercial and industrial battery energy storage system includes Lithium Iron Phosphate (LiFePO<sub>4</sub>) battery packs connected in high voltage DC configurations.
