# **Polish double-glass bifacial modules with aluminum frames**

## Overview

---

What are bifacial HJT solar modules?

The highly efficient heterojunction technology, in combination with the glass-glass architecture, facilitate a new generation of high class solar modules. Due to a very low power-loss of the cell and its symmetrical structure, the bifacial HJT solar modules offer a significant additional yield.

Why should you choose a bifacial module?

Our industry-leading module power contributes to a conversion efficiency of 22.7%. Bifacial ratio reaches 80%, 30% more power generation than conventional modules. Two-sided double-glazed modules, symmetrical structural design, low risk of hidden cracks. Higher power output even under low irradiance environments like on cloudy or foggy days.

What is a bifacial 108-cell n-type HJT solar module?

Bifacial 108-cell N-TYPE HJT solar module in glass-glass construction, black frame. The monocrystalline solar module, with glass-glass construction and white mesh back-sheet, impresses with its very high wattage. As a "multi-output module", it is ideal for commercial properties and specially designed for the safety-conscious homeowners.
