Port Louis Energy Storage Containers Expandable Trading Conditions

Overview

Does Port-Louis need to improve its container handling performance?

Port-Louis faces more serious regional competitors than used to be the case – Toamasina in Madagascar was barely regarded as a peer for Port-Louis ten years ago, but with significant Japanese investment has in many ways surpassed it. 6.49. This all suggests that performance in container handling needs to improve significantly. 6.50.

How will poor productivity affect Port-Louis' position as a container hub?

Poor productivity in container handling increases costs of trade and - just as damaging in the long term - may imperil Port-Louis' position as a potential container hub, without which it will not achieve economies of scale and, as a 'secondary' destination, will face longer, slower and more expensive trade routes with its trading partners. 1.10.

How efficient is Port-Louis?

A. The World Bank assessed Port-Louis to have an average technical efficiency score of around 30%, with ports such as Mombasa and Djibouti among the most technically efficient ports (Figure 29 above)¹³⁶.

Does Port-Louis handle bulk goods?

For Port-Louis, this is mainly relevant as regards container handling. Bulk goods are imported to serve the needs of the domestic market, so the scale of bulk handling is not likely to change rapidly. However, there is scope for the Port to handle a greater volume of containers for transshipment.
