Port Moresby communication wind power base station manufacturer

Overview

What is Port Moresby power station?

The Port Moresby Power Station will provide reliable power to Port Moresby and is the lowest cost dedicated grid connected thermal generation in the country. Replacing heavy fuel oil and diesel, the gas-fired power plant also brings a material reduction in the environmental impact from power generation in PNG.

How will the niupower Port Moresby power station improve reliability?

Once online, the NiuPower Port Moresby Power Station will greatly improve the reliability of the Port Moresby power grid and, we have been advised by our customer PNG Power, will reduce the cost of power supply into the grid by up to PGK100 million (EUR27 million) per annum.

Who is responsible for Papua New Guinea's 58MW power plant?

Under the agreement, Wärtsilä takes full responsibility for the operations of the 58MW power plant, which is the first ever utility-scale gas-engine powered plant in Papua New Guinea. The operation and maintenance of the plant is remotely supported by Wärtsilä Expertise Centres.
