# **Portable power solar station in Jordan**

## Overview

---

Where is the first solar-powered charging station in Jordan?

Jordan inaugurated its first solar-powered charging station for electric cars in February 2012. Located at El Hassan Science City (EHSC), the station is considered the first step towards promoting solar-powered vehicles and building more solar-charging facilities on the streets of Jordan.

What is the solar energy potential in Jordan?

The solar energy potential in Jordan is enormous as it lies within the solar belt of the world with average solar radiation ranging between 5 and 7 KWh/m<sup>2</sup>, which implies a potential of at least 1000GWh per year annually. Solar energy, like other forms of alternative energy, remains underutilized in Jordan.

What is the largest power station in Jordan?

The Aqaba Thermal Power Station is the largest power station in Jordan, with a total generation capacity of 656 MW. It consists of five steam turbines units (5 x 130 MW) and two hydraulic turbines (2 x 3 MW). The power station is fueled by natural gas and fuel oil.

Will Aqaba get a solar water heating system?

As per the Energy Master Plan, 30 percent of all households are expected to be equipped with solar water heating system by the year 2020. The Government is hoping to construct the first Concentrated Solar Power (CSP) demonstration project in the short to medium term and is considering Aqaba and the south-eastern region for this purpose.
