# **Portugal s share of portable energy storage lithium batteries**

## Overview

---

Should Portugal produce battery-grade Li-compounds?

Therefore, the production of battery-grade Li-compounds in Portugal would aid the EU in lessening its dependence on external sources for this strategic metal, assisting as well in increasing the domestic supply of raw materials for battery manufacturing. Portugal has been the sole European lithium producer since 2011 (USGS 2024).

How much lithium does Portugal have?

Portugal has noteworthy lithium (Li) resources (306 thousand tonnes - kt) that should be suitably assessed to realistically support an expected expansion of known reserves (ca. 53 kt Li), as reported in several studies (e.g. Dinis and Horgan 2018; Filipe et al. 2010).

How will industrial-scale innovation impact the battery industry in Portugal?

The industrial-scale implementation of these innovations would allow other prospects in Portugal to be exploited, channelling, in part or totally, their production to the battery sector and likely increasing reserves up to 225 kt ( ).

#### 4.4. Policy considerations.

Are the world's top lithium-producing countries doing their best?

The latest data from the US Geological Survey shows that the world's top lithium-producing countries are doing their best to meet rising demand from energy storage and EV sectors. Global lithium production rose sharply from 2023 to 2024, reaching 240,000 metric tons (MT) of lithium content in 2024, compared to 204,000 MT in 2023.

## Portugal s share of portable energy storage lithium batteries

---

### Portugal is the only EU country that ranks in ...

The latest data from the US Geological Survey shows that the world's top lithium-producing countries are doing their best to meet rising ...

### Portugal's Lithium battery Market Report 2025

In 2021, Spain (X tons) constituted the largest lithium battery supplier to Portugal, accounting for a 37% share of total imports. Moreover, lithium battery imports from Spain ...

### Portugal is the only EU country that ranks in the Top 9 lithium

The latest data from the US Geological Survey shows that the world's top lithium-producing countries are doing their best to meet rising demand from energy storage and EV ...

## ELECTRICITY STORAGE IN PORTUGAL

PORTUGUESE STORAGE AS OF TODAY  
 Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co ...

### Lithium resources and electric mobility in Portugal within the

... environmentally and socially responsible economy. Initially optimised for a wide range of devices, the lithium-ion battery became an essential component of emerging clean ...

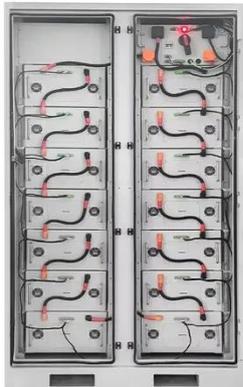

### Full article: Lithium resources and electric mobility in Portugal

By multiplying the total energy in the car stock (E) for the lithium material intensity (It,Li) for each technology t and the market share of each battery chemistry (St), we are able to ...

### Portugal Energy Storage Market (2025-2031)

To Strive forward No Energy Waste

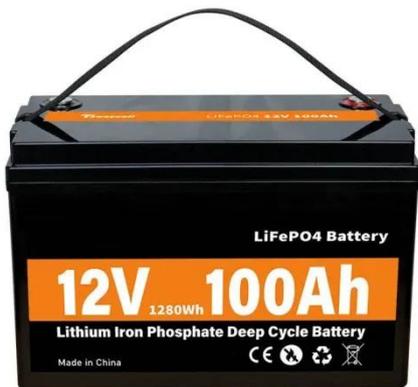

- ✓ All in one
- ✓ 100~215kWh High-capacity
- ✓ Intelligent Integration

Portugal Energy Storage Market Top 5 Importing Countries and Market Competition (HHI) Analysis Portugal`s energy storage import market in 2024 continued to be dominated by key ...

## Portugal Battery Energy Storage Market Size, Share, Trends ...

The Portugal battery energy storage market size reached USD 40.24 Million in 2025. The market is projected to reach USD 290.57 Million by 2034, growing at a CAGR of 24.57% during 2026 ...

## PORTUGAL S LITHIUM BATTERY MARKET REPORT

Battery Energy Storage Systems (BESS) are becoming essential in the shift towards renewable energy, providing solutions for grid stability, energy management, and power quality. However, ...

## Europe's Lithium Supply Chain Resilience and Investment ...

The global transition to clean energy hinges on securing resilient supply chains for critical minerals like lithium. As Europe seeks to reduce its dependence on Chinese-dominated ...

## Europe's Lithium Supply Chain Resilience and ...

The global transition to clean energy hinges on securing resilient supply chains for critical minerals like lithium. As Europe seeks to ...
