# **Price of 275W and 330W solar panels**

## Overview

---

How much does a 330W solar panel weigh?

330W solar panels tend to weigh about 40 lbs, being approximately 65 inches long and 43 inches wide. Monocrystalline modules with this wattage tend to have 60 cells, but polycrystalline ones could have 72 due to lower efficiency. The efficiency range of 330W solar panels lies between 15 and 22% depending on the manufacturer.

How much do 335w solar panels cost?

335W panels off-the-shelf cost around £150 to £200 depending on quality but bigger capacity panels are around £180 to £280. On average you will need around 10 solar PV panels on a roof to power the average house, or eight bigger capacity panels. So you're looking at at least a couple of thousand for the panels themselves.

How much does a 325 watt solar panel cost?

However, solar panel 325 watt price varies from brand to brand. You can get a Trina solar module for under \$200, but Panasonic 325W solar panel will cost you around \$350. Most Chinese brands try to keep 325 W solar panel price low, but European, Japanese, American companies prefer focusing on the highest quality of their product.

Are 330 watt solar panels expensive?

They may be somewhat less expensive, but their quality standards are equally rigorous. These are by no means rules without exception, just some very general guidelines. You can browse 330 watt solar panels for sale in our store. Don't hesitate to contact us if you have any questions.
