Price of installing solar panels on 4 2 m²

Overview

In 2025, a 4 kW solar panel system costs around \$11,200 before incentives, based on real installation data from across the country. How much does solar panel installation cost?

Let's look at how much solar panel installation costs. The cost of solar panels varies hugely depending on the type and size of the system you require. A 4kW photovoltaic (PV) system, suitable for a 2-3 bedroom house typically costs around £8,000 (incl. installation). Including an inverter and solar battery takes the average cost to around £12,000.

How much do solar panels cost in 2024?

That being said, the cost of solar panels isn't a one-size-fits-all figure. Several factors play into the final price you'll pay for solar energy, and understanding these variables is crucial. The average cost for solar panels in 2024 is around \$2.50 to \$3.50 per watt. This price includes both the cost of the panels and installation.

How much does a 4 kW solar panel cost in 2025?

In 2025, a 4 kW solar panel system costs around \$11,200 before incentives, based on real installation data from across the country. But your actual price will depend on factors like your roof's complexity, local labor costs, the equipment you choose, and what incentives are available in your area.

How much does a solar system cost?

The solar industry doesn't have a standard pricing structure, so the cost to the customer is based on their energy consumption. The cost of a solar system installation can vary widely when you compare the efficiency rate of the solar panels and other installation expenses. The best solar panels can set you back anywhere from \$15,000 to \$50,000.
